

**Description**

Director DR2 - QR111 - is a track-mounted remote controlled spotlight that is controllable in pan, tilt and dimmer level using the hand-held controller, DMX or DALI. To be installed on universal single-phase track, the DR2 is also available in a sequencing version which allows the light to move through a sequence of up to ten pre-recorded positions. A range of accessories is available. DR2 is compatible with most world voltages and frequencies.

**Applications**

The DR2 is ideal for installations where the objects being lit are moved or replaced frequently. Spotlights that may be difficult or dangerous to reach but still require manual adjustment, can be replaced by the safe and easy to use DR2. The sequencing DR2 or colour accessories can be used to add drama and value to any project.

**Individual Selection**

The patented method of selection using a laser from a hand-held controller allows individual control over each fitting. The Global function allows multiple units to be dimmed or the recall of stored positions. Alternatively, control by DMX or DALI is also available.

**Lamp Change**

A unique spring-loaded wishbone design allows for quick and easy changes.

**Pan & Tilt Rotation 360° / 180°**

The innovative technology within the DR2 allows the user precise control over the direction of the beam.

**Sequencing**

The DR2 can be set into a continuous sequence that will move through up to 10 recorded positions of pan/tilt and dim level. For sequencing option, please add the prefix 'M' to the product code (i.e. 21312M).

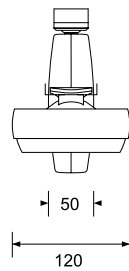

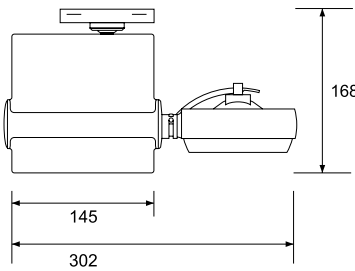

**Beam Control**

The accessory holder in the head of the DR2 allows for numerous accessories. See below for details.

**Mounting**

Single-circuit adaptor that is compatible with 1-Circuit Eutrac, Concord Lytespan 1 and Global single circuit. Other mounting options are available on request.
