

**Description**

Director DR8 - QR111 - is a track-mounted remote controlled spotlight that is controllable in pan, tilt and dimmer level using the hand-held controller, DMX or DALI. To be installed on universal 3-circuit track, the DR8 is also available in a sequencing version which allows the light to move through a sequence of up to ten pre-recorded positions. A range of accessories is available. DR8 is compatible with most world voltages and frequencies.

**Applications**

The DR8 has been specifically designed for high-end museum, gallery and hospitality applications where its sophisticated glare control and accessories can be used to best effect. The width of the gear housing allows the luminaire to operate within a channel 200mm wide.

**Individual Selection**

The patented method of selection using a laser from a hand-held controller allows individual control over each fitting. The Global function allows multiple units to be dimmed or the recall of stored positions. Alternatively, control by DMX or DALI is also available.

**Lamp Change & Lamp Indicator**

The unique cartridge design allows simple lamp change without the use of tools. During selection, the colour of the flashing LED indicates the bandwidth of the lamp.

**Pan & Tilt Rotation 360° / ±90°**

The innovative technology within the DR8 allows the user precise control over the direction of the beam.

**Sequencing**

The DR8 can be set into a continuous sequence that will move through up to 10 recorded positions of pan/tilt and dim level. For sequencing option, please add the suffix 'M' to the product code (i.e. 81312M).

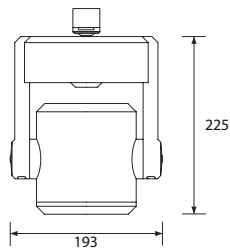

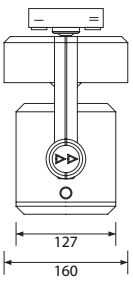

**Beam Control**

The accessory holder in the head of the DR8 comes fitted with a glare control snoot and baffle as standard. Numerous other accessories are also available, see below for details.

**Mounting**

3-circuit adaptor that is compatible with 3-Circuit Eutrac and most 3-Circuit European tracks. 3-Circuit Global track adaptor available on request
